Quote of the Month

**“We have witnessed
astonishing advance-
ments in computer
technology just in our
lifetime. Preparing
every student with a
sound foundation in
computer program-
ming whatever their
chosen career path –
will help them create
the advancements of
the future”**

-James McGovern

CYBER SECURITY

Brent Hutfless Founder, Cannon Reef LLC

Led the information security programs in his last three roles at a Top 100 US Federal contractor and two US Navy headquarters-level commands. Successfully implemented security initiatives that align to NIST, ISO, and HIPAA compliance frameworks, and advises organizations and industry groups on these and other GRC frameworks and regulatory requirements. He is passionate about security and technology, and has significant experience with strategic planning, budgets, contracts, advising on compliance, regulatory and cyber risks, project and program management, and enjoys presenting, writing, mentoring and finding innovative solutions to enable business. Successful track record of completing challenging security, IT, and core business projects and programs across manufacturing, healthcare,

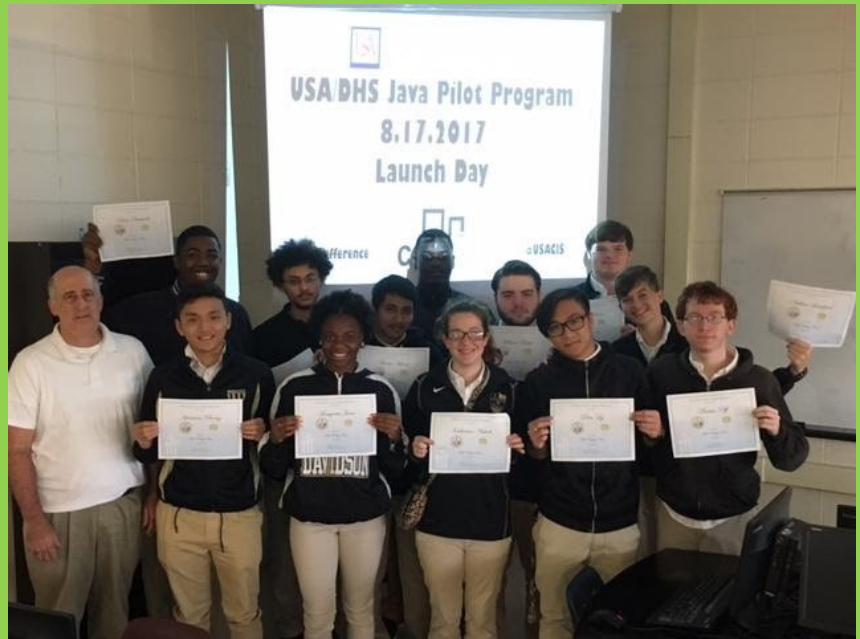

CURRENT NEWS

SEPTEMBER 2017

USA Davidson HS AP Java Pilot Program Launch Day

Pictured at the right are the 12 DHS Students participating in the 2017 USA/DHS Java Pilot Program and their USA instructor, Tom Johnsten.

These students will receive direct instruction from the USA Faculty and Staff through the year as they have the opportunity to earn their first college credit! These students are CTE Completers who earned a qualifying score on the AP Computer Science Principles Exams in its inaugural year. We are extremely proud of this group of students and their DHS teacher Mrs. Wright for making this happen.

ALUMNI PROFILE

Christoph Kemnade is originally from Germany and moved to the United States during his high school years. For his undergraduate work he attended Washington and Lee University in Lexington, Virginia where he majored in Computer Science and Accounting. After graduating with honors and induction into the Phi Beta Kappa honor society, Christoph went to work for IBM, where he worked for the Transaction Processing Facility Division.

Christoph currently is the Vice President of Programming at On-Line Information Services, Inc., a Mobile based company which provides court technology for large statewide court systems. He joined the company in its early stages and has helped it grow and succeed over the years. During his time at On-Line Information Services, he successfully obtained a Masters degree in Information Science from the USA School of Computing. He also graduated from the USA Mitchell College of Business and holds a Masters of Business Administration degree.

Christoph lives in Mobile with his wife Kelly. After becoming a naturalized US citizen and having lived the majority of his life in the United States, he considers the United States home, and the Gulf Coast in particular. However, an avid soccer fan, he still cannot bring himself to root for the US over Germany when they meet on the soccer field.

UPCOMING EVENTS:

Remarks/Cake cutting to celebrate 5 years in Shelby Hall

Date and Location: September 1, 2017 at the Shelby Hall atrium

Time: 11:30 a.m. – 2:00 p.m.

Everyone's welcome. If you are interested in having your high school attend cake cutting ceremony, please contact Lori Harris at Inharris@southalabama.edu and 251-414-8064.
